THERMOCHIMICA ACTA, VOLUME 114 (1987)

SUBJECT INDEX

Acetone,
thermodynamics of complex formation reactions in non-aqueous solvents. Part I. Reactions of silver(I) with pyridine and related ligands in acetone (Van Vuuren et al.) 295
Acetonitrile,
liquid–liquid equilibria for the acetonitrile + methanol + saturated hydrocarbon and acetonitrile + 1-butanol + saturated hydrocarbon systems (Nagata) 227
α-Alanine,
the thermodynamics of ionization of α-alanine in methanol + water mixtures and the determination of single ion thermodynamics (Chakravorty et al.) 245
Aliphatic alcohols,
excess enthalpies of binary solvent mixtures of 2-butanone with aliphatic alcohols (Pikkarainen) 239
n-Alkanes,
molar excess volumes of binary mixtures of ethylbenzene with n-alkanes at 298.15 K; an interpretation in terms of the Prigogine–Flory–Patterson model (Awwad et al.) 337
Alloys,
studies of the crystallization processes of amorphous Zr–Co based alloys by DSC (Jansson, Nygren) 35
Aluminium,
thermal decomposition of 8-hydroxyquinoline complexes with aluminium, cobalt, manganese and nickel (Kokkonen et al.) 329
Amino acids,
the emission thermophotometry (ETP) of some amino acids (Wendlandt) 381
2-Aminopyrazine,
electrical properties of charge transfer complexes of 2-aminopyrimidine and 2-aminopyrazine Schiff bases with nitrobenzene derivatives (Darwish et al.) 265
the electrical properties of some 2-aminopyrimidine and 2-aminopyrazine Schiff bases (Mounir et al.) 257
2-Aminopyrimidine,
electrical properties of charge transfer complexes of 2-aminopyrimidine and 2-aminopyrazine Schiff bases with nitrobenzene derivatives (Darwish et al.) 265
the electrical properties of some 2-aminopyrimidine and 2-aminopyrazine Schiff bases (Mounir et al.) 257
Anhydrite,
diplacement reactions in gypsum and in anhydrite (Bayer, Wiedemann) 75
Antimony(III) oxide,
the enantiotropic phase transition of antimony(III) oxide (Jones et al.) 61

Bentonite,
variability in water sorption and in thermogravimetry of bentonite (Stepkowska, Jefferis) 179
Bis-(2-chloroethylethyl) sulfide,
on the activation energy for the hydrolysis of bis-(2-chloroethylethyl) sulfide. II (Yang et al.) 313
Bismuth carbonate,
thermal decomposition of basic bismuth carbonate under high pressure of CO_2 and N_2 up to 50 atm (Henmi et al.) 393
1-Butanol,
liquid–liquid equilibria for the acetonitrile + methanol + saturated hydrocarbon and acetonitrile + 1-butanol + saturated hydrocarbon systems (Nagata) 227
2-Butanone,
excess enthalpies of binary solvent mixtures of 2-butanone with aliphatic alcohols (Pikkarainen) 239

Calcium sulfate,
Effect of carbon and silica on the reduction of calcium sulfate (Mu, Zaremba) 389
Carbohydrate,
thermal analysis of protein–carbohydrate mixtures in oxygen (Ziderman et al.) 109
C 80 calorimeter,
vapour pressure, heat of evaporation and thermal conductivity determination by means of the C 80 calorimeter (Pithon, Rouyer) 91
Chloride systems,
phase diagram studies of chloride systems—common and not-so-common methods (Seifert) 67
Cloud point,
determination of cloud point for petroleum middle distillates by differential scanning calorimetry (Heino) 125

Coal combustion,
an approach with use of EGA to the mechanism of sulfur release during coal combustion (Schouten et al.) 171
Cobalt,
thermal decomposition of 8-hydroxyquinoline complexes with aluminium, cobalt, manganese and nickel (Kokkonen et al.) 329
studies of the crystallization processes of amorphous Zr–Co based alloys by DSC (Jansson, Nygren) 35
Combustion gases,
TG study of sorbent materials for desulfurization of combustion gases at high temperature (Hakvoort et al.) 103
Computer controlled isothermal analysis,
computer controlled forced stepwise isothermal analysis (Husum, Sørensen) 131
Copper,
structure–stability relationship of copper-(II)–indol carboxylic acid derivative complexes from spectrophotometric, thermogravimetric and potentiometric studies (Zayed, Nour El-Dien) 359

Desulfurization,
TG study of sorbent materials for desulfurization of combustion gases at high temperature (Hakvoort et al.) 103

Electrochemistry and calorimetry,
electrochemistry and calorimetry coupling. III. Determination of interesting thermal effects in a double compartment adiabatic electrolysis cell (Boudeville, Burgot) 187
Energetic materials,
thermal decomposition of energetic materials. 20. A comparison of the structural properties and thermal reactivity of an acyclic and cyclic tetramethylenetetranitramine pair (Oyumi et al.) 209
Ethanol,
solubility studies of polyethylene glycols in ethanol and water (Haglund) 97
Ethylbenzene,
molar excess volumes of binary mixtures of ethylbenzene with n-alkanes at 298.15 K; an interpretation in terms of the Prigogine–Flory–Patterson model (Awwad et al.) 337

Fluoroperoxo species of transition metals,
solid-state decomposition studies on fluoroperoxo species of transition metals. Part XIII. Kinetics of isothermal decomposition of $K_2[V_2O_3(O_2)_2F_2]$ and $K_3[Ta(O_2)_2F_4]$ (Ghosh, Jere) 347

Gas-phase water,
cluster model of the gas-phase water (Slanina) 273
Glass transition temperature,
effect of the side chain structure on the glass transition temperature. 2. Poly(*o*-alkylphenyl methacrylate)s (Gargallo et al.) 319
Glass-transition temperatures,
glass-transition temperatures of PVME–PS blends. Influence of the molecular weight of PS (Schneider, Leikauf) 165
Goethite,
adsorption of nitrogen and water vapour onto goethite surfaces (Koch, Møller) 139
Gypsum,
displacement reactions in gypsum and in anhydrite (Bayer, Wiedemann) 75

Heat conduction flow calorimetry,
heat conduction flow calorimetry measurement of partial molar excess enthalpies: extrapolation to infinite dilution (Cesari et al.) 373
High resolution mass spectrometry,
interpretation of TG curves with help of high resolution mass spectrometry (Lajunen, Kokkonen) 29
8-Hydroxyquinoline complexes,
thermal decomposition of 8-hydroxyquinoline complexes with aluminium, cobalt, manganese and nickel (Kokkonen et al.) 329

ICTA reference materials,
studies on ICTA reference materials using simultaneous TG–DTA (Charsley et al.) 53
Indol carboxylic acid,
structure–stability relationship of copper-(II)–indol carboxylic acid derivative complexes from spectrophotometric, thermogravimetric and potentiometric studies (Zayed, Nour El-Dien) 359
Instrumentation in thermal analysis,
applications of new methods and instrumentation in thermal analysis (Barnes) 1

Kinetic parameters,
on the kinetic parameters from non-isothermal data: mathematical considerations (Cusidó et al.) 201
$K_3[Ta(O_2)_2F_4]$,
solid-state decomposition studies on fluoroperoxo species of transition metals. Part XIII. Kinetics of isothermal decomposition of $K_2[V_2O_3(O_2)_2F_2]$ and $K_3[Ta(O_2)_2F_4]$ (Ghosh, Jere) 347
$K_2[V_2O_3(O_2)_2F_2]$,
solid-state decomposition studies on fluoro-

peroxo species of transition metals. Part XIII. Kinetics of isothermal decomposition of $K_2[V_2O_3(O_2)_2F_2]$ and $K_3[Ta(O_2)_2F_4]$ (Ghosh, Jere) 347

Lanthanoid sulfites,
studies on lanthanoid sulfites. Part VI. Thermogravimetric study of scandium sulfite pentahydrate (Leskelä et al.) 153
Lipids,
oxidation of lipids studied by isothermal heat flux calorimetry (Raemy et al.) 159

Metal oxalates,
molten potassium pyrosulfate: the reactions of seven metal oxalates (Mineely, Tariq) 281
Metal salicylates,
solid state decomposition studies on metal salicylates. Kinetics of isothermal dehydration of some transition metal salicylato complexes (Kokkonen et al.) 145
Methanol,
liquid–liquid equilibria for the acetonitrile + methanol + saturated hydrocarbon and acetonitrile + 1-butanol + saturated hydrocarbon systems (Nagata) 227
the thermodynamics of ionization of α-alanine in methanol + water mixtures and the determination of single ion thermodynamics (Chakravorty et al.) 245
Modelling in calorimetry,
modelling in calorimetry working under isothermal conditions or in scanning mode (Vergnaud) 15

New methods in thermal analysis,
applications of new methods and instrumentation in thermal analysis (Barnes) 1
Nickel,
thermal decomposition of 8-hydroxyquinoline complexes with aluminium, cobalt, manganese and nickel (Kokkonen et al.) 329
Nitrobenzene,
electrical properties of charge transfer complexes of 2-aminopyrimidine and 2-aminopyrazine Schiff bases with nitrobenzene derivatives (Darwish et al.) 265
Nitrogen,
adsorption of nitrogen and water vapour onto goethite surfaces (Koch, Møller) 139
Non-aqueous solvents,
thermodynamics of complex formation reactions in non-aqueous solvents. Part I. Reactions of silver(I) with pyridine and related ligands in acetone (Van Vuuren et al.) 295
Non-isothermal data,
on the kinetic parameters from non-isothermal data: mathematical considerations (Cusidó et al.) 201

Oxygen,
thermal analysis of protein–carbohydrate mixtures in oxygen (Ziderman et al.) 109

Petroleum,
determination of cloud point for petroleum middle distillates by differential scanning calorimetry (Heino) 125
Phosphate-based cutting fluids,
thermoanalytical investigation of the interaction of phosphate-based cutting fluids with an iron surface (Osten-Sacken et al.) 287
Poly(*o*-alkylphenyl methacrylate)s,
effect of the side chain structure on the glass transition temperature. 2. Poly(*o*-alkylphenyl methacrylate)s (Gargallo et al.) 319
Potassium pyrosulfate,
molten potassium pyrosulfate: the reactions of seven metal oxalates (Mineely, Tariq) 281
Polyethylene glycols,
solubility studies of polyethylene glycols in ethanol and water (Haglund) 97
Protein,
thermal analysis of protein–carbohydrate mixtures in oxygen (Ziderman et al.) 109
PVME–PS blends,
glass-transition temperatures of PVME–PS blends. Influence of the molecular weight of PS (Schneider, Leikauf) 165
Pyridine,
thermodynamics of complex formation reactions in non-aqueous solvents. Part I. Reactions of silver(I) with pyridine and related ligands in acetone (Van Vuuren et al.) 295

Reaction calorimetry,
reaction calorimetry for the development of chemical reactions (Grob et al.) 83

Saturated hydrocarbon,
liquid–liquid equilibria for the acetonitrile + methanol + saturated hydrocarbon and acetonitrile + 1-butanol + saturated hydrocarbon systems (Nagata) 227
Scandium sulfite pentahydrate,
studies on lanthanoid sulfites. Part VI. Thermogravimetric study of scandium sulfite pentahydrate (Leskelä et al.) 153
Schiff bases,
electrical properties of charge transfer complexes of 2-aminopyrimidine and 2-aminopyrazine Schiff bases with nitrobenzene derivatives (Darwish et al.) 265
the electrical properties of some 2-aminopy-

rimidine and 2-aminopyrazine Schiff bases (Mounir et al.) 257
Silver(I),
thermodynamics of complex formation reactions in non-aqueous solvents. Part I. Reactions of silver(I) with pyridine and related ligands in acetone (Van Vuuren et al.) 295
Sulfur,
an approach with use of EGA to the mechanism of sulfur release during coal combustion (Schouten et al.) 171

Tetrachlorobis(N,N,N^1,N^1-tetramethylurea) uranium(IV),
the solid state chemistry of uranium. Part IV. The thermal decomposition and kinetics of tetrachlorobis(N,N,N^1,N^1-tetramethylurea) uranium(IV) (Jacobs, Van Vuuren) 303
Tetramethylenetetranitramine,
thermal decomposition of energetic materials. 20. A comparison of the structural properties and thermal reactivity of an acyclic and cyclic tetramethylenetetranitramine pair (Oyumi et al.) 209
TG–DTA,
studies on ICTA reference materials using simultaneous TG–DTA (Charsley et al.) 53
TG–DTA–mass spectrometry,
a new integrated system for simultaneous TG–DTA–mass spectrometry (Charsley et al.) 47
Transition metal salicylato complexes,
solid state decomposition studies on metal salicylates Kinetics of isothermal dehydration of some transition metal salicylato complexes (Kokkonen et al.) 145

Uranium,
the solid state chemistry of uranium. Part IV. The thermal decomposition and kinetics of tetrachlorobis(N,N,N^1,N^1-tetramethylurea) uranium(IV) (Jacobs, Van Vuuren) 303

Water,
a cluster model of the gas-phase water (Slanina) 273
adsorption of nitrogen and water vapour onto goethite surfaces (Koch, Møller) 139
solubility studies of polyethylene glycols in ethanol and water (Haglund) 97
the thermodynamics of ionization of α-alanine in methanol + water mixtures and the determination of single ion thermodynamics (Chakravorty et al.) 245
variability in water sorption and in thermogravimetry of bentonite (Stepkowska, Jefferis) 179

XLPE-pipe,
thermoanalytical study of an aged XLPE-pipe (Figueroa) 115

Zirconium,
studies of the crystallization processes of amorphous Zr–Co based alloys by DSC (Jansson, Nygren) 35
